

Excerpt from '05 seminar book.

<p>Front Suspension RS90K RS90RK RSG90K RST90K / TFK</p>	 <p>The diagram illustrates the front suspension systems for two models, RX10 and RS90. It shows a top-down view of the chassis and suspension components. The RX10 Roll Center is indicated by a point lower than the RS90 Roll Center, which is indicated by a point higher up. The RS90 Roll Center is labeled 'RS90 Roll Center' and the RX10 Roll Center is labeled 'RX10 Roll Center'.</p>	<p>These RS models have the 2nd generation front double wishbone suspension.</p> <p>The ski spindles are shorter and geometry is revised to raise the roll center and lower the center of gravity for lighter steering feel.</p> <p>The A-arms are steel, The front shocks are Kayaba (shorter overall length when compared to the RX10).</p>
