

NYTRO XTX SETUPS

TY Member	ChaseMe25		
Date	2/10/2010		
Nytro Year and Model	2009 XTX		
Rider Weight (Lbs)	185 + Gear		
Rider Style	Moderate - Aggressive		
Riding Area/Conditions	Iowa - Ditch/River/Trail		
On/Off Trail split	75 / 25		
Skis			
Ski Type (Stock, other)	Stock		
Toe Out	5/8"		
Ski Bushings/Mounting	Bushings towards outside - Skis set at wide		
Front Shocks			
Spring preload length	9"		
Compression clicks out	3 to 6 out from Full Hard		
Rebound clicks out	3 out from Full Hard		
Sway Bar	Set at Front/Upper Hole		
Rear Suspension			
Front Limiter Strap	Stock (As long as they can be)		
Torsion (soft,med,hard)	Soft		
Control/Transfer Rod	43mm (1 5/8") gap when fully extended		
Center Shock			
Spring Preload Length	7 1/4"		
Rear Shock			
Compression clicks out	3 out from Full Hard		
Comments	Steering does not feel as heavy. Wider ski stance and sway bar link mounting change made a noticable difference. Suspension feels good - not too stiff and not too soft.		
Suspension Mods	None - Stock
